Choice Seed Potatoes

PLANTING SEASON—1915

ANDERSON & CO., LIMITED,

Seedsman & Plant Merchants,

GEORGE STREET, SYDNEY

ANDERSON'S "SATISFACTION."

OUR STOCKS OF SEED POTATOES

are, as usual, very carefully selected, and are clean, dry, and in fine condition, and having been picked in our warehouse, are very prime Seed, and may be relied on to give good results, provided a favorable season follows the planting.

The varieties we offer in quantity are all good standard sorts, the quality and productiveness of which is well known.

Anderson & Co., Ltd.

SYDNEY, July 1st, 1915.

NOTES FOR CUSTOMERS

We deliver free in all Suburbs, and on Rail or Steamer, Sydney. Varieties sold out will be substituted, unless not desired.

These prices will be kept to as far as possible.

As we go to press—Prices are advancing rapidly.

CHOICE SEED POTATOES

NAMES AND DESCRIPTIONS.	PRICES.		
	Per cwt.	Per 28-lb.	Per 14-lb.
Anderson's Improved Early Rose. This is one of the best-known and most largely grown of the early Seed Potatoes. It is a very sure cropper, and is very largely cultivated. This season's stocks are in splendid order, and of excellent quality. £15 per ton.	16/-	4/6	2/6
Anderson's Satisfaction. This grand Potato—originally named and sent out by us for the first time many years ago—is now one of the very best Potatoes cultivated, and is in large demand. It is almost too well known to need description; the skin is a rich brown in color, in some districts getting almost pink. "Satisfaction" is a sure cropper, and yields heavily.	14/-	3/9	2/3
Brownell's Beauty. This is a main crop variety, and a very heavy yielding Potato, grown in some districts almost to the exclusion of all others. It is a variety that can always be depended upon, and should be grown on almost every farm; in the northern districts it does well.	15/-	4/-	2/6
Anderson's Southern Star. This Potato was named and sent out by us some years ago, and has proved a most excellent variety, although the stock is not always obtainable. It has a pale pink skin, with a dark eye, is a splendid keeping Potato, and boils well, and has become quite a favorite. It should be grown for the main crop.	14/-	3/9	2/3
Manhattan. For this grand Potato there has been quite a demand the past few seasons; it is one of the most distinct Potatoes grown. The tubers have a mottled skin, purple and yellow or white. It is a very hardy variety, and a splendid show Potato, and in some districts is now largely in demand. Stock limited.	15/-	4/-	2/6
Up-To-Date. This variety is largely grown in some places, is a good cropping Potato, roughish skin, kidney shaped, with well-set eyes.	14/-	3/9	2/-

SPECIAL QUOTATIONS FOR LARGE LOTS.

Anderson's Choice Seed Potatoes

NAMES AND DESCRIPTIONS.	PRICES.		
	Per cwt.	Per 28-lb.	Per 14-lb.
Cambridge Kidney. Kidney Potatoes have been in very short supply this past season or two, and the stock available this season is very small. This is a second early variety, but of exceptional merit. It has a fine flavour, an excellent table Kidney, and for private use.	16/-	4/6	2/6
Queen of the Valley. This is a round Potato, red skinned, rather rough in appearance, but a second early variety, and very suitable for cold districts. Unfortunately, the supply is limited; it does remarkably well in New England and some of the southern parts of the State.	14/-	3/9	2/-
Extra Early Vermont. This is a well-known early Potato; indeed, the true variety is rather earlier than the "Early Rose." Skin rather darker in color; a favorite Potato with many growers for the market. It yields heavily, and when quickly grown is of fine quality.	16/-	4/6	2/6
Alpine Wonder. We are offering this "frost-resistant" Potato from the same source of supply as last year. We have large numbers of testimonials as to its being all that is claimed for it. Our stock this season, which is limited, comes from the original raiser. It produces large crops, somewhat in appearance like "Early Rose;" skin not quite so deep in color.	12 lb.	for 7/6,	9d. lb.
Carmen No. 1 (stock limited.) This is a mid-season Potato, white skinned, round in shape, with shallow eyes. The quality of this variety is very superior, and few cook better; it moreover keeps well, and is a good cropper.	16/-	4/6	2/6
Coronation (stock limited.) This is a late-maturing Potato, one of the blue-skinned type, slightly mottled, and somewhat resembling "Manhattan," but a much later variety. This fine Potato is known by other names, but it is grown in New South Wales under the name now listed.	14/-	3/9	2/-
Premier (stock limited.) A new Potato, of which we have comparatively very few. It is a nice red-skinned variety, oblong shape, a good yielder, and keeps well. The flesh is of fine quality, and makes an excellent table Potato. It is rather late in maturing.	16/-	4/6	2/6
Brown's River (stock limited.) This is a blue-skinned Potato, somewhat resembling "Manhattan," but a little smaller in size. Our stock comes from the southern districts, where it has been tried this season with most satisfactory results. It is a late variety, and keeps very well.	14/-	3/9	2/-

To Prevent Irish Blight and other Fungus Diseases from attacking Potatoes,

SPRAY Plants with "BORDEAUX."
